Dr. John Torrey.
Columbia College
N. Y.

My Dear Sir;—

I enclose to you a fragment of an Eritrichium, which Dr. Gray says is E. crassisepalum Torr, and yet he gives the same name to my Specimens of another, smaller and very distinct species. I suppose the smaller, annual rooted species to be the true, E. crassisepalum. The plant enclosed, grows with the other, but its root is fusciculate, and it is altogether a different thing. Will you do me the kindness to name it for me. Dr. Parry has suggested that I write to you about it. I would have sent you complete specimens, in a package, but that I understand we must now pay letter rates on packages of dried plants; however if you need better material in order to determine I will supply you willingly.

TORREY CORRESPONDENCE
